## General notes:

\*Some plants had already begun to fruit when they were planted (Most likely: Red Racer, and Fantastico)

6/6 Midnight Snack has many small fruits starting, looks like it will be very prosperous

6/11 Harvested one tomato from Valentine and Fantastico

6/19 Several fruits ripened on Valentine and Fantastico, earliest of all varieties. Hail damage to Chef's Pink. Chef's orange and green should begin to fruit soon, late fruiterers.

6/26 Orange and green still haven't fruited, soon

7/9 Fantastico, Valentine and Patio Yellow all producing a lot. Red Racer has produced some.

## General Notes:

- Fantastico and Valentine were earliest to produce

- Fantastico, Valentine, Patio Yellow, Candyland had exceptional yields. Everything had very good yield but these were some of the best.

- Chef's orange and Midnight Snack I like the best, flavorful
